

The New System1[®] Gen3

The Perfect Solution for Star Stations

Technology is changing—so is the emissions testing industry—and Opus Inspection, Inc. has an exciting offer to take your business into the future. Replace your aging BAR97 analyzer with Gen3 and get more without paying more.

Your revenue is tied to the reliability of your analyzer. And Gen3 is the newest, most reliable analyzer on the market for testing model year 1999 and older vehicles.

When you rent Gen3 you get:

- The most technologically advanced equipment available
- Internet-ready for high-speed VID communication
- Enhanced equipment reliability—which means less downtime
- Parts and labor service agreement for analyzer and dynamometer
- Free consumables including calibration gas, sample system filters and toner cartridge (Zero Air not included)
- A no-commitment rental agreement—cancel at any time
- Delivery and installation at no extra charge
- Dyne interface cable for Mustang, Maha, or Clayton dynes

Service Second to None

We're always just a phone call or click away.

For service:

Call: 800-695-4377 or 866-623-8378

- Wireless remote control mouse
- OBD interface module for 1996-1999 vehicles
- Barcode reader
- Optional Wireless Kit
 - Wireless OBD module
 - Barcode reader
 - Wi-Fi card

Optional Integrated Evap System (Pending BAR Certification)

- Fully integrated with Gen3 analyzer system
 - No phone line—No slow dial-up communication
 - Easy to follow prompts on the analyzer monitor
 - Uses the analyzer's keyboard and mouse for data input
- Designed for ease of use and saves floor space
 - Mounts to the side of the Gen3 analyzer, so the analyzer's footprint stays the same
 - No additional cart or storage space needed
 - 30' fill hose

Dynamometer

- Gen3 analyzer operates with all BAR certified dynamometers including ESP/Mustang, Clayton and Maha (except LAD unit)
- Note: Dynamometer must be fully operational. If shop does not have a ASM dynamometer, Opus Inspection can supply one at additional cost.

Customer Responsibility

- Dedicated analog phone line for VID communications.
Please be advised: In 2018, BAR will require high-speed internet connection to Gen3.
- Compressed air supply with dedicated filter, regulator and water separator assembly
- Zero Air Supply
- Printer paper
