

>> Opus Prodox AB (publ) Press Release - 10th of February, 2011

Success for Opus at the AUTO Exhibition 2011 and a New Service Contract Signed with Bilia

In January 2011, the Opus Group participated at the AUTO Exhibition 2011 in Gothenburg, Sweden, with an impressive display. The event proved very successful. At the exhibition, our subsidiaries Opus Bima and J&B Maskinteknik, together with YIT Sverige AB, launched a new innovative concept with a focus on becoming an all-inclusive service provider for Swedish automotive repair shops. As a result, the Opus Group becomes a one-source supplier, from concept and design of vehicle workshops, to product consultancy, leasing, installation, training and warranty, as well as service & calibration.

"We received a lot of attention for the concept and there are many customers who now want to discuss entering into long-term contracts", says Mats Löwendahl, CEO of Opus Bima. "We received most attention from our customers for launching an industry-first five-year warranty on our products. A long-term partnership between Opus and our clients will benefit both parties and enhance efficiency and profitability for our customers".

"We recognize that today's workshop managers are under significant competitive pressure. We invite them to turn to us; we will service all of their workshop equipment, including equipment not delivered by the Opus Group", says John-Anders Hansson, CEO of J&B Maskinteknik. "A service agreement with us will save time for the workshops and make them more efficient while avoiding costly downtime. The most recent signing of a service contract with Bilia Personbilar AB for all workshops in Region West and Region South is further proof of our attractive offering. Based on an increasing demand from our other customers, we are now looking to hire new service technicians in Gothenburg, Malmö, Växjö, Stockholm and Norrland", Hansson says.
