Press Release - 22nd of December, 2009

Opus Obtains Contract Extension in Connecticut

Opus Prodox AB (publ) today announces that its wholly-owned subsidiary SysTech International LLC, has received a one-year extension from the Connecticut Department of Motor Vehicles for its current contract for management and maintenance of the State's Emissions Database Management System (EDBMS) for the statewide enhanced emissions inspection program.

The EDBMS was developed and installed by SysTech in 2003 and is fully Internet based, with all inspection station equipment on-line at all times during station business hours. Over 1 million tests per year are being conducted on the EDBMS.

"We are grateful that the Connecticut Department of Motor Vehicles continues to have confidence in SysTech's EDBMS", says Lothar Geilen, CEO of SysTech. "This extension is proof of the exemplary business relationship we have maintained with the DMV. We remain fully committed to supporting the advanced technology SysTech developed for the State and ensuring continued uninterrupted service to DMV and the Connecticut vehicle inspection stations."

The amendment extends the term of the contract for a one (1) year period from May 9, 2010 to May 9, 2011.

The value of the contract extension is not disclosed due to competitive reasons. The extension does not trigger any earn-out payments to the sellers of SysTech.
