

Low-Pressure Fuel Evaporative System Testing

Two Great Solutions for the California Smog Check Program!

ESP Waekon System

Part# ESP11344-1

Features:

- Complete System. Includes filler neck adapters, pinch pliers, calibration tank, Evap line hose plugs and leak verification balloons
- Stand-alone unit with rugged cabinet and wheels for easy movement
- BAR Certified
- Proven design, most popular solution in California

Gen3 Integrated Evap System

Part# 01-17000-400-01

Features:

- Specifically designed to bolt to the side of BAR97 Gen3 Cabinet
- Operator interface is through the Gen3 analyzer screen and keyboard
- Lowest cost solution for Evap testing
- BAR Certified
- **Does not include accessory kit, Kit sold separately**

Vehicles 1995 & older need their fuel evaporative system tested.
ESP has the best systems to do it.

Technical Specifications

ESP Waekon System

Part# ESP11344-1

Electrical/Mechanical:

- Tester Size: roll-around 2 wheel ruggedized cart
39"H x 24.5"W x 14.5"D
- Weight: 60 lbs. (including adapters and accessories)
- Inlet Hose Connection: industrial quick connect
w/ integrated line and filter regulator
- Fuel Tank Connection Hose: 15 ft., red, grounded
- Power: 110VAC

Measurement:

- Test Duration: 6 - 11 minutes
- Test Pressure Applied: 14" H2O Gauge +/- 1"H2O
(about 1/2" psi)

Certifications:

- BAR Certified

Connectivity:

- Communication Via data cable to
BAR97 analyzer system.

Gen3 Integrated Evap System

Part# 01-17000-400-01

Electrical/Mechanical:

- Tester bolts on side of BAR97 Gen3 cabinet
- Tester size: 9.25"H x 18"W x 2"D
- Inlet Hose Connection: industrial quick connect
w/ integrated line and filter regulator
- Fuel Tank Connection Hose: 21 ft., red, grounded

Measurement:

- Test Duration: 6 - 11 minutes
- Test Pressure Applied: 14" H2O Gauge +/- 1"H2O
(about 1/2" psi)

Certifications:

- BAR Certified

Connectivity:

- Communication via direct cable connection to
BAR97 analyzer system

Evap Accessory Kit

Part# 01-17000-400-10

(only required for integrated system users if shop
not equipped with these required components)

- Filler neck adapters
- Pinch Pliers
- Calibration tank
- Nitrogen regulator
- Evap line hose plugs
and leak verification balloons

Direct delivery, simple set-up

EVAP Systems are shipped direct to your shop. An instructional DVD demonstrates assembly, and ESP's Call Center is ready to assist should you have any questions.

Your Choice!

Purchase the equipment or participate in
EaaS monthly payment plan.
