3 Tender description

Within the context of the European H2020 NEMO project, Opus TS needs to acquire a set of customized printed circuit boards (PCBs) following a pre-established design provided by the contractor. The contractor shall modify the provided initial design to adapt it to EU standards, propose improvement and design alternatives, manufacture the components and test the PCBs accordingly to specifications.

This contract includes the provision and assembly of the electronic components (connectors, microcontrollers, board components, etc.) on the PCBs and the validation of the boards prior to delivery.

The circuits have the following purposes:

- Power supply and power control.
- LEDs and alignment control.
- Source power stabilization.
- CPU control.
- Peripherals control circuits.

Technical details are confidential and cannot be published. More information will be provided individually to all the interested bidders once they contact OPUS regarding this tender.

4 Tender submission

The tender's deadline is 30th April 2021.

The tender must be sent by email with an attached PDF to the Tender contact specified above.
